PRESS RELEASE

INTERPUMP GROUP SELLS ITS STAKE IN UNIELECTRIC

S. Ilario d'Enza 27 September 2011 – Interpump Group has sold its 70% stake in Unielectric (producer of windings and electric motors) to EME for Euro 3.5 million. EME has also acquired the remaining 30% from minority shareholders.

The first third of the price (Euro 1.2 million) was paid in cash on the date of sale; the second third will be paid by 15 December 2012, and the last third by 15 December 2013. The deferred payments are guaranteed by bank sureties.

The Group has sold its stake in Unielectric because it no longer considers such investment strategic in the context of the Group's operations, which currently focus on the Industrial Sector (high and very high-pressure pumps) and on the Hydraulic Sector (power take-offs, hydraulic pumps, hydraulic cylinders and other components).

In 2010, Unielectric had turnover of Euro 26.3 million (Euro 24.8 million net of intercompany).
